

Module 4 Quiz

Question 1/15

In regards to MySQL RDS Instance, state whether below statements are true or false.

Statement 1 : Multi-AZ Instance cannot be promoted to read replica.

Statement 2 : Read replica can be launched in another region for RDS MySQL

A

Statement 1 is false and Statement 2 is true

B

Statement 1 is true and Statement 2 is false

C

Both statements are true

D

Both statements are false

Question 2/15

Vinay wants to migrate legacy database to AWS Cloud infrastructure and would like to use Amazon DynamoDB. Which of the below listed migration service should Vinay use?

A

AWS DMS

B

AWS Schema Conversion Tool

C

AWS DMS along with AWS Schema Conversion Tool

D

None of the above

Question 3/15

Finance team at Accenture is planning to host their data on AWS Cloud and have following requirements:

1. Ability to store data as JSON documents.
2. High Availability and Durability.

What will you recommend?

A

Amazon EFS

B

Amazon Redshift

C

DynamoDB

D

AWS Cloud Formation

Question 4/15

Which of the below listed options is used to increase data transfer between On-Premise data centers and AWS Services?

A

AWS WAF

B

AWS Direct Connect

C

AWS S3 Transfer Acceleration

D

AWS Global Accelerator

Question 5/15

_____ is a service used to transfer data between on-premise storage to AWS S3, EFS and FSX.

A

AWS S3 Transfer Acceleration

B

AWS DMS

C

AWS DataSync

D

AWS Storage Gateway

Question 6/15

In regards to MySQL RDS Instance, is it right to say that users can configure read replica in another region?

A

YES

B

NO

Question 7/15

Amit wants to install 200 GB relational database on EC2 instance, The database will be used infrequently with slight peaks in morning and evening. Which storage type will be the most cost effective in this scenario?

A EBS provisioned IOPS SSD

B EBS Cold HDD

C EBS General Purpose SSD

D EFS

Question 8/15

State whether below statement is TRUE or FALSE.

IOPS measures the number of read and write operations per second whereas throughput measures the number of bits read or written per second.

A TRUE

B FALSE

Question 9/15

One of the organizations is generating large datasets with millions of rows and they would like to summarize column-wise. Which data storage should the organization use?

A RedShift

B RDS

C Elasticache

D DynamoDB

Question 10/15

State whether below statement is TRUE or FALSE.

Amazon Redshift uses 2MB block size, which is more efficient and further reduces the number of I/O requests needed to perform database loading.

A

TRUE

B

FALSE

Question 11/15

Which of the following options can be used to store session data in case of a web application hosted in AWS?

- A. Cloudwatch
- B. DynamoDB
- C. ElastiCache
- D. Storage Gateway

A

A,B

B

A,C

C

B,C

D

A,D

Question 12/15

There are lot of images getting stored on S3. Metadata of these images needs to be stored in a persistent storage and also needs to be indexed. Which of the following options will you use?

A

Aurora

B

DynamoDB

C

S3

D

RDS

Question 13/15

Is it right to say that Cloudwatch can be used to monitor API activities?

A

YES

B

NO

Question 14/15

Is it right to say that one Cloudtrail can be enabled for all regions?

A

YES

B

NO

Question 15/15

_____ is a in-memory solution that can be used infront of a database to cache common queries issued against the database.

A

Cloudfront

B

Elasticate

C

ELB

D

SNS

Congratulations!

You have completed the quiz.
You got: **15** out of **15**
questions right.

EXIT
